PROFILE

Software engineer and solutions engineer pursuing an MSc in Computer Science (Cybersecurity) at NTU, with 2+ years running proof-of-concept builds, automating CI/CD pipelines, and troubleshooting security and application issues across the software lifecycle. CKA-certified through hands-on Kubernetes labs, with a strong CS foundation from a 3.9 GPA Software Engineering degree.

EXPERIENCES

ASIC Technologies • DevSecOps Engineer | Hanoi, Vietnam

September 2024 to April 2026

- Directed high-intensity 2-week proof-of-concept builds, troubleshooting and iterating on solution configurations under tight timelines to meet customer-defined success criteria, coordinating across security, DevOps, and development teams.
- Conducted application security assessments during demos and PoCs, including:
 - Manual validation of SAST/DAST findings to reduce false positives.
 - Source code review focused on insecure data flows, authentication/authorization flaws, input validation issues, and business logic weaknesses.
 - Targeted manual testing to supplement automated scans in complex application paths.
- Deployed enterprise-grade AppSec solutions (Synopsys / Black Duck Software) by embedding SAST, SCA, IAST, DAST, and ASPM into client development lifecycles spanning developer's IDE to production release.
- Ran hands-on research on CVE and n-day vulnerabilities, testing exploitability hypotheses and tuning detection rules as a preventative measure to improve scan accuracy against real-world attack patterns.
- Technologies: Kubernetes, Docker, GitLab, Jenkins, CI/CD, DevSecOps, SAST, SCA, DAST, IAST, Source Code Review, Manual Security Testing, CVE & n-day Analysis, Burp Suite, OWASP Top 10.

Sandhills Global • Software Developer | Lincoln, NE, USA

January 2024 to August 2024

- Built and integrated REST APIs for internal web apps with enterprise SSO, RBAC, and directory service integration, enabling secure access for multiple business units.
- Shipped full-stack features with secure-by-design principles (input validation, error handling, data integrity), measurably reducing post-release defect rates.
- Implemented automated testing and CI/CD pipelines to improve deployment consistency and reduce post-release defects by 30%.
- Technologies: C#, .NET, React, MySQL, REST APIs, CI/CD, Agile.

NSAA • Associate Product Manager | Lincoln, NE, USA

August 2023 to May 2024

- Built and maintained Python/Django REST APIs and backend services powering self-service features, integrating role-based access control and compliance requirements.
- Led PostgreSQL data model redesigns to improve performance, integrity, and access control.
- Worked closely with engineering and QA teams across multiple releases to improve product quality and stability.
- Technologies: Python, Django, Figma, HTML/CSS, PostgreSQL, CI/CD, Agile Development.

Hudl • Associate Software Engineer | Lincoln, NE, USA

August 2022 to May 2023

- Built full-stack web features and REST API integrations used by 200+ organizations and collaborated across multiple release cycles, focusing on scalability, data integrity, and usability while maintaining code quality.
- Technologies: JavaScript, TypeScript, C#, HTML/CSS, React, CI/CD, Agile Development, d3.js.

TECHNICAL SKILLS

Systems & Infrastructure: Kubernetes (CKA — cluster upgrades, RBAC, NetworkPolicy, PV/PVC & kube-proxy troubleshooting), Docker, Linux

Languages & Scripting: Python (Django, REST APIs), C#, JavaScript/TypeScript, SQL

Distributed Systems & DevOps: CI/CD (Jenkins, GitLab), Git, Automated Testing, Agile

Security & Reliability: Root-Cause & Vulnerability Analysis (CVE/n-day), SAST/DAST/SCA/IAST, OWASP Top 10

EDUCATION & CERTIFICATION

Nanyang Technological University (NTU) | Singapore

August 2026 — Expected [Month Year]

Master of Science in Computer Science — Cybersecurity

University of Nebraska—Lincoln | Lincoln, NE, USA

Graduation: May 2024

Bachelor of Science in Software Engineering (High Distinction)

GPA: 3.9 / 4.0

Language Proficiency - English (Fluent-Native), Vietnamese (Native)

Certificates - Certified Kubernetes Administrator (CKA), Practical DevSecOps — Certified DevSecOps Professional (PSDO-CDP)
